FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida increased by 3.7 percent or 190,500 new jobs over the year to reach 5,299,900 in August. Job growth has been slowing during most of 1989.
- Government was Florida's fastest growing sector, increasing by 5.5 percent or 42,700 new jobs over the year. This is in response to gains in local government education employment.
- Services and trade employment increased by the largest amount, up by 72,100 and 61,400, respectively, over the year. These two industries accounted for seven of every ten new jobs in the state.
- Tampa-St. Petersburg-Clearwater MSA gained the highest number of new jobs (+30,800) over the year and the Ft. Myers-Cape Coral MSA grew at the fastest pace (7.4 percent) of Florida's MSAs.
- Florida's unemployment rate stood at 5.2 percent in August which was the same as the national rate. The month and year-ago rates were not significantly different from the current rate.

FLORIDA'S NONAGRICULTURAL EMPLOYMENT

SEASONALLY ADJUSTED, AUGUST 1988–AUGUST 1989

* = Less than one-tenth of one percent.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida grew by 3.6 percent or 183,300 new jobs to reach a total of 5,313,100 in September. Job growth has slowed significantly throughout 1989.
- Florida still remained as the fastest growing populous state in terms of its job growth rate in September (3.6 percent). California was second with an annual job growth rate of 2.7 percent.
- Construction employment in Florida continued to reflect weakened conditions with a loss of 12,900 jobs since January 1989.
- Services employment led all sectors with a gain in new jobs over the year of 66,500 to reach 1,487,100 in September. Most of the new employment growth was in the subsector of health services, responding to overall population growth and retirees.
- Florida's September unemployment rate stood at 5.6 percent representing 348,000 jobless Floridians. The U.S. rate was slightly below Florida's at 5.3 percent in September.
- Average annual pay statistics for Florida vs U.S. are included in this issue.

FLORIDA'S NONAGRICULTURAL EMPLOYMENT
SEASONALLY ADJUSTED, SEPTEMBER 1988–SEPTEMBER 1989

Release Date: November 1989
Data Month: September 1989

Letter No. 481

JOB GROWTH SLOWS: Florida's seasonally adjusted nonagricultural employment rose by 3.6 percent or 183,300 new jobs in September to reach a total of 5,313,100. Job growth in Florida has continued to slow since January when job gains were just under 270,000 on an annual basis. Seven of the eight major industry divisions gained new employment levels in September with construction being the only industry experiencing job losses. Those industries in Florida growing at a pace faster than that of the statewide average were government, services, and trade. Those industrial sectors growing slower than that of the statewide average were mining; finance, insurance, and real estate; transportation, communications, and public utilities; manufacturing; and construction.

Higher Growth Sectors: Government was Florida's fastest growing sector in September on an annual basis. It was up by 5.3 percent or 41,500 new jobs over the year. The majority of the employment growth (67.0 percent) was in the local government education subsector, as it has responded to population gains. Local government employment growth has been strong during most of 1989 and it likewise has been strong in other states in the nation in recent months. Government employment accounted for 15.5 percent of total employment in September. The employment total in September surpassed the previous peak employment month of November 1988 which included all election poll workers.

Services remained in September as Florida's largest industry (1,487,100) and the industry gaining the highest absolute number of new jobs (66,500) on an annual basis. It grew at 4.7 percent over the year. Although this is a strong growth rate, it is not as strong as it was previously during the year. Most of the slow-down can be attributed to business services as it responds to slower manufacturing gains and overall economic activity. Health services remains as the only subsector contributing the most to overall services growth. Services jobs accounted for 28.0 percent of total nonagricultural employment in Florida.

Trade was Florida's third fastest growing industry with a gain of 4.4 percent or 61,500 new jobs over the year. Trade is Florida's second largest industry with an employment level of 1,462,400. Together, trade and services employment gains accounted for 70.0 percent of total new jobs in the State of Florida. Eating and drinking places led the pack of trade subsectors as the industry gaining the most jobs--29.0 percent of new trade jobs.

SLOWER GROWTH SECTORS: Finance, insurance, and real estate (FIRE) grew by 3.1 percent or 11,300 new jobs over the year. This industry has slowed in the last couple years as it has responded to financial deregulation and increased competitiveness, and the savings and loan failures. In years past this industry was always one of Florida's very fastest growing. Particular weakness has been recorded in the credit agencies which have shown flat employment conditions over the year. This entire industry sector (FIRE) is 7.0 percent of total nonagricultural jobs.

Transportation, communications, and public utilities (TCPU) grew by a slow 1.0 percent or 2,500 jobs over the year. Many of the problems in this sector can be associated with the air transportation strike. After losing almost -10,000 air transportation jobs in March 1989, there have been improvements in the employment level. The loss of air transportation jobs now currently is down to -3,500 on an annual basis. Trucking and warehousing was the healthiest subsector within this industry, while railroads and passenger trains lost employment. This entire industry sector (TCPU) accounted for 5.0 percent to total employment in the state.

Manufacturing grew in September by 0.8 percent or 4,300 new jobs over the year. This is slightly slower than growth recorded earlier this year. Manufacturing faces stiff competition nationwide and abroad and faces softened demand. Electrical and electronic equipment; printing and publishing; and transportation equipment were Florida's strong manufacturing subsectors. Fabricated metals was the sector recording the highest job losses (-1,100).

Despite the slowing in this sector, factory employment in Florida remains at an all time high with positive growth and no loss of jobs, as has happened nationwide. Manufacturing accounted for 10.0 percent of Florida's total nonagricultural jobs.

Construction employment has declined steadily since January 1989. It currently has lost -1.3 percent or -4,600 jobs over the year. The news is worse if comparisons are made from January 1989, which was the peak employment month for construction. Since January, construction employment was down by 12,900 jobs. Some of this decline can be attributed to a backlog of vacant units due to overbuilding when financing was readily available. Some of the decline may be due to economic uncertainty or pessimism, or the expectation of falling interest rates in the near future. Construction employment accounted for 6.5 percent of total nonagricultural employment in the state.

FLORIDA AND ITS MSAs: Florida's fastest growing MSAs in terms of new jobs were Ft. Myers (6.9 percent) and West Palm Beach-Boca Raton (6.1 percent) over the year. Tampa and Miami gained the highest absolute number of new jobs with Pensacola recording the least growth among Florida's MSAs.

FLORIDA AND THE OTHER STATES: Florida's annual growth rate in jobs remained as the fastest of the eleven populous states, despite the slower growth in 1989. Florida's rate at 3.6 percent over the year was followed by California's at 2.7 percent. Massachusetts was the only populous state to lose employment over the year (down -0.2 percent or -7,200 jobs). In terms of absolute number of jobs created over the year in all states, Florida ranked second highest (181,100) behind California (331,900), not seasonally adjusted.

When all the states in the nation are compared on annual job growth rates, less populous states took the lead. They were Nevada (5.8 percent), Washington (5.1 percent), Utah (4.4 percent), Alaska (4.2 percent), Idaho (4.1 percent), and South Carolina (4.0 percent). Just over half of the nation's states reported gains in construction and manufacturing. Nearly all states recorded positive growth in services, trade, and government.

FLORIDA'S JOBLESS: Florida's unemployment rate stood at 5.6 percent in September representing 348,000 jobless out of a labor force of 6,194,000. The changes in Florida's unemployment rate over the past month and year have not been statistically significant. Factors contributing to Florida's higher unemployment rate are the construction sector and the fact that Florida is not absorbing its new population growth into jobs at the same pace as before. Florida's unemployment rate has fluctuated over the last year with the range of rates being between 4.8 and 6.4 percent. The national rate of unemployment was 5.3 percent in September, which is 0.3 below Florida's 5.6 percent rate.

Of the nation's states, there were 12 states with unemployment rates below 4.0 percent. Hawaii (2.2 percent) had the lowest rate, while West Virginia recorded the highest rate (8.1 percent).

When comparing the eleven populous states, Florida's unemployment rate at 5.6 percent was 8th lowest. North Carolina recorded the lowest rate of 4.0 percent while Michigan's rate was the highest at 8.1 percent.

Of Florida's 20 MSAs, the Gainesville MSA had the lowest unemployment rate (2.8 percent) while the Ft. Pierce MSA recorded the highest rate (10.9 percent).

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida grew by 3.6 percent or 185,100 new jobs to reach a total of 5,334,800 in October. Florida's annual job growth rate remained as the fastest of the nation's eleven most populous states. California was second with a job growth rate of 2.6 percent. Overall job growth has been slowing in Florida during 1989.
- Services employment led all sectors with a fastest job growth rate (4.7 percent) over the year, the highest number of new jobs (+67,600), and the largest overall level of employment (1,498,900) in October. Health services accounted for 1/3 of total services employment growth.
- Construction remained as the only major industry to lose jobs over the year, with a loss of 3,800 or 1.1 percent. Part of this is due to slower overall economic growth in the state, past overbuilding activity, and anticipations of future declines in interest rates.
- Florida's unemployment rate stood at 5.8 percent representing 364,000 jobless Floridians out of a labor force of 6,259,000 in October. This was 0.5 percentage points higher than the national rate of 5.3 percent. The Gainesville MSA (3.2 percent) recorded Florida's lowest rate while the Panama City MSA recorded the highest rate (10.3 percent) in October.

* = Less than one-tenth of one percent.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment increased by 3.0 percent or 157,500 new jobs over the year to reach 5,365,100 in November. Job gains in Florida have slowed during 1989 to less than half of their earlier pace. Despite this, Florida's job growth rate was the fastest of the nation's 11 most populous states.
- Services remained as Florida's fastest growing sector with a gain of 5.2 percent or 75,100 new jobs over the year. Health services employment was the main contributor to the services' gains.
- Construction was the only major industry to lose employment over the year with a loss of 1.2 percent or 4,100 jobs. Construction is responding to slower overall economic activity, overbuilding, and interest rates that have stabilized.
- Florida's unemployment rate stood at 5.6 percent in November representing 351,000 jobless out of a labor force of 6,296,000. Over the last twelve months Florida's unemployment rate has ranged from a high of 6.4 percent to a low of 4.8 percent. The national rate of unemployment was 5.4 percent in November, 0.2 percentage points lower than the Florida rate.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida grew by 3.8 percent or 195,400 new jobs over the year to reach 5,392,900 in December. Despite a significant slowdown in Florida's job growth rate, it still remained as the fastest growing when compared to the nation's eleven most populous states.
- Services and trade were Florida's two largest industries accounting for 7 of every 10 new jobs in the state. Services was Florida's fastest growing sector (5.2 percent) over the year and the sector gaining the highest number of new jobs (+75,200).
- Construction remained as the only major industrial sector to lose jobs. The loss was -1.4 percent or -5,000 jobs since December a year ago. Overbuilding, investors hoping for lower interest rates, and a lack of pent-up demand continued to plague this industry.
- Florida's unemployment rate stood at 5.8 percent representing 362,000 jobless out of a labor force of 6,262,000 in December. This rate continued to be above the national rate of 5.3 percent. Florida's job growth has slowed more than population growth, making it more difficult for new and reentrants in the labor force to be absorbed into employment.

* = Less than one-tenth of one percent

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida increased by 4.4 percent or 227,000 new jobs over the year to reach 5,402,100 in January. This annual growth rate shows considerable improvement over most of 1989. The annual average growth in jobs for 1989 was 4.1 percent, compared to 4.5 percent in 1988.
- Services remained as Florida's fastest growing industry (up by 7.1 percent) and the industry gaining the highest number of new jobs (103,100) in January over the year. Over one fourth of the new jobs were in the health services subsector.
- Florida's volatile industries, construction and manufacturing, both showed improvement in January. Construction exhibited losses in 1989, but recorded a gain in January of 1,300 jobs or 0.4 percent over the year. Manufacturing was growing at less than 1.0 percent in 1989, but was up in January by 7,600 jobs or 1.4 percent over the year.
- Florida's unemployment rate (seasonally adjusted) was 5.5 percent in January representing 349,000 jobless out of a labor force of 6,289,000. This rate remained above the national rate of 5.3 percent in January. Of Florida's 20 MSAs, the Gainesville MSA recorded the lowest unemployment rate (3.4 percent) in January while the Panama City MSA recorded the highest (11.8 percent), not seasonally adjusted.
- Revised nonagricultural employment estimates for 1988 and 1989 are enclosed.

GOVERNMENT	821.3	818.8	788.4	2.5	0.3	32.9	4.2

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

(P) - Preliminary Estimate

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Florida's nonagricultural employment increased by 4.0 percent or 207,800 new jobs over the year to reach 5,412,100 in February. After benchmark revisions for 1989, Florida's annual gain in new jobs remained about the same as it was a year ago.
- Services was Florida's fastest growing industry over the year (6.8 percent) and the industry gaining the highest number of new jobs (+100,000). More than 1 of 4 new jobs in services were from the medical services subsector.
- Construction was Florida's only major industry to lose jobs over the year (down 0.2 percent or 800 jobs). This industry had improved during the fourth quarter of 1989. It remains as Florida's most volatile industry responding to interest rates, inventory levels, population growth, and other state and national economic conditions.
- Florida's unemployment rate stood at 6.0 percent (seasonally adjusted) in February representing 380,000 jobless out of a labor force of 6,369,000. Agricultural layoffs in late January responding to the holiday freeze in Florida contributed to a higher jobless count in February.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida increased by 4.0 percent or 209,300 new jobs over the year to reach 5,433,400 in March. The annual growth rate has been steady for two months but is down from January's rate of 4.4 percent.
- Services and transportation, communications, and public utilities (TCPU) were the fastest growing industries over the year (both at 6.8 percent). TCPU recorded such strong gains due to the drop in transportation employment a year ago resulting from the airline strike. Services recorded continued robust growth due to health-related services employment.
- Both manufacturing and construction lost jobs over the year of -0.1 percent and -0.7 percent, respectively. These industries remain as Florida's most volatile sectors responding to interest rates and other national economic conditions.
- Florida's seasonally adjusted March unemployment rate was 5.2 percent representing 330,000 jobless out of a labor force of 6,351,000 in March. For the nation's eleven most populous states, North Carolina recorded the lowest rate at 3.4 percent and Michigan recorded the highest at 7.2 percent. The national unemployment rate was tied with the Florida rate at 5.2 percent in March.

LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment in Florida increased by 4.7 percent or 243,400 new jobs over the year to reach 5,450,600 in April. This is a faster pace than that recorded earlier this year.
- Both manufacturing and construction returned to positive growth over the year. Manufacturing was up a slight 0.2 percent or 1,200 jobs and construction was up 0.3 percent or 900 new jobs. Both sectors are responding to national economic conditions and interest rates.
- Transportation, communications, and public utilities was Florida's fastest growing sector this month on an annual basis (up 7.9 percent). This was due to recovery from low employment levels a year ago because of the airline labor dispute. Services was Florida's largest industry and second fastest growing (up 7.8 percent) due to strong demand in health services.
- Florida's unemployment rate in April was 5.7 percent representing 364,000 jobless out of a labor force of 6,336,000. This was slightly higher than the national rate of 5.4 percent in April.

* = Less than one-tenth of one percent.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

(P) - Preliminary Estimate

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Florida's nonagricultural employment increased by 4.5 percent or 234,500 new jobs over the year reaching 5,495,100 in May. This was the fastest growth rate of the eleven most populous states. California ranked second at 2.5 percent.
- Services remained as Florida's largest industry and was also the fastest growing (up 7.6 percent) due to additional employment in business and health services and hotels and other lodging places. Transportation, communications and public utilities was the second fastest growing at 7.5 percent.
- Construction employment took a downturn over the year in May losing 4,700 jobs as manufacturing remained stable. These are Florida's most volatile industries responding to the slowdown in the state and national business cycle. Construction activity has dropped substantially in the state as some areas remain overbuilt.
- Florida's unemployment rate in May was 5.4 percent (not seasonally adjusted) representing 342,200 jobless out of a labor force of 6,5301,800. The national unemployment rate was slightly lower at 5.1 percent.

% = Less than one-tenth of one percent.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

(P) - Preliminary Estimate

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Florida's nonagricultural employment growth in June was 4.2 percent over the year or 221,900 new jobs. Even though this rate has slowed slightly, Florida remains as the fastest growing of the eleven most populous states. California and Ohio are tied for second at 2.4 percent.
- Services, the largest industrial sector in the State of Florida, was the fastest growing at 7.1 percent or 106,100 new jobs over the year. Transportation, communications and public utilities was the second fastest growing continuing its recovery from labor disputes in the airline industry.
- Construction and manufacturing were still the only industries to lose employment over the month and year due to sluggish economic conditions.
- Unemployment in Florida increased to 6.6 percent of the labor force representing 419,900 jobless persons. This is the highest uneployment rate recorded in Florida since July 1985. The national unemployment rate was 5.3 percent, not seasonally adjusted.

* = Less than one-tenth of one percent.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durable goods and nondurable goods in manufacturing and wholesale and retail in trade may not add to totals due to lack of adjustment to durable goods and wholesale trade.

(P) - Preliminary Estimate

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.

FLORIDA LABOR MARKET TRENDS

FLORIDA DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY • BUREAU OF LABOR MARKET INFORMATION

Highlights:

- Nonagricultural employment (seasonally adjusted) for the State of Florida increased by 240,400 new jobs or 4.5 percent over the year to reach 5,533,500 in July.
- Florida remained as the fastest growing of the eleven most populous states. California ranked second at 2.6 percent and Ohio was third at 2.4 percent.
- Government was the fastest growing industrial sector in Florida with a 9.7 percent growth rate. Services created the largest number of new jobs (101,500) over the year. Transportation, communications and public utilities still rebounding from employment losses in the airline industry, recorded a 6.0 percent growth rate.
- Employment losses over the month and year occurred in the industrial sectors of mining, construction and manufacturing as they respond to the national and state economic slowdown.
- Florida's unemployment rate dropped to 5.7 percent in July representing 360,600 jobless out of a labor force of 6,313,000. The national unemployment rate increased slightly to 5.5 percent, in July.

(1) - These series do not have a consistent seasonal pattern and consequently do not pass criteria for seasonal adjustment. Total nonagricultural employment is the sum of all major industries and is not adjusted. Durables and nondurables in manufacturing and wholesale and retail in trade may not add to total due to lack of adjustment to durables and wholesale.
